PSREA Sprint 3 | Issue count

Issue count

Reflections

1. Did the sprint goals help in completing the project?

Ans: Yes, the sprint goals helped in organizing the tasks clearly. Each sprint focused on specific requirements, which made the work easier to manage.

2. Were the tasks distributed effectively across the three sprints?

Ans: Yes, the tasks were distributed based on their priority and dependencies. The core and high-priority tasks were completed in the earlier sprints, while the remaining features were completed later.

3. Did you face any challenges during sprint planning?

Ans: Yes, it was important to decide the correct priority and order of the tasks. However, after identifying the dependencies between requirements, the sprint planning became easier.

4. How did prioritizing tasks affect the sprint outcome?

Ans: Prioritizing tasks helped ensure that the most important features were completed first. This reduced the risk of leaving high-priority requirements incomplete.
